Cobra CLI

# Profile

Dynamic and dedicated DevOps Engineer and Backend Developer with over 5.5 years of experience. A passionate learner committed to exploring new technologies and methodologies. Ready to leverage expertise in driving innovation and continuous improvement in dynamic work environments.

# **Employment History**

#### Software Consultant, IDP Education, Melbourne(Remote)

December 2022 - Present

- Developed automated error tracking alerts and incident management systems to enhance application reliability and reduce downtime.
- Designed and implemented user-friendly command-line interfaces (CLI) to automate manual tasks for developers, resulting in increased productivity and efficiency.
- Led a Community of Practice (COP) team of five members dedicated to enhancing application stability and reliability, fostering collaboration and implementing best practices.

#### Senior Software Engineer, IDP Education LLP, Chennai

April 2020 – December 2022

- Implemented end-to-end quality checks via GitLab CI, accelerating delivery to customers while maintaining high standards of quality assurance.
- Engineered scalable microservices for IELTS, serving millions of users worldwide, contributing to seamless user experiences and robust performance.
- Spearheaded the prototyping of diverse Infrastructure as Code (IaC) patterns utilizing AWS CDK, resulting in enhanced developer productivity and streamlined deployment processes.

#### Software Developer, Sify Technologies Ltd, Chennai

July 2018 - March 2020

- Implemented DevSecOps automation solutions utilizing AWS, Jenkins, and GitLab CI, resulting in a 2x acceleration in deployment timelines.
- Oversaw the management of an AWS Kubernetes cluster and implemented automated deployment processes, enhancing efficiency and reliability.

#### Languages

English

Tamil

• Engineered a web application Chatbot utilizing the RASA stack with Python, effectively reducing support ticket volume by addressing common queries proactively.
